

STORAGE TENT

Modular storage facilities with a roofed space. Everything within hand's reach. It can be placed on any paved surface. A quick, practical solution without the need for a building permit. Facilities for your employees or machinery. You can work outside even when the weather isn't great. Easy installation and assembly of modules.

Brief description

- Two storage modules are connected by a rigid construction with a PVC tarpaulin
- The durable 610 g/m² PVC tarpaulin guarantees strength of the material as well as a higher load capacity in the event of snow
- It provides a leeward position thanks to the tarpaulin
- Variable tarpaulin with an optional number of walls and wall type (fixed or opening)
- There is no need for complicated structures, the walls consist of container modules
- Option of adding lighting or external heating

STORAGE TENT

algeco®

Use

- Roofed outdoor workshop
- Mobile warehouses with an outdoor workshop for work in all weather conditions
- Garage space for small and large construction machines

Main advantages

- The storage makes all your work material easily accessible
- Easy installation on module walls
